You can also use the Italian Nave Cavour aircraft carrier which is sold with the **X-Trident** Harrier AV-8B (payware aircraft).

We will automatically detect the Nave Cavour if the AV_8B is installed as follow :

Aircraft/AV-8B v2.0 for x-plane 11.50+/
or
Aircraft/Fighters/AV-8B v2.0 for x-plane 11.50+/
or
Aircraft/Military/AV-8B v2.0 for x-plane 11.50+/
or
Aircraft/PAYWARE/Fighters/AV-8B v2.0 for x-plane 11.50+
or
Aircraft/XTrident/AV-8B v2.0 for x-plane 11.50+/
or   if the Nave Cavour folder is dropped as follow :

FlyWithLua/Scripts/Simple_Ground_Equipment_and_Services/Nave Cavour/

Alternatively it is also possible to write your own path to the Nave Cavour object in the file FlyWithLua/Scripts/Simple_Ground_Equipment_and_Services_CONFIG_vehicles.lua
